NETOP™
TeachPad™
Classroom Management Assistant

The Netop TeachPad™ is the unique hardware device that puts the essential features of classroom management at your fingertips. Supervise students, demonstrate lessons, control web surfing and lock computer screens with the touch of a button. Effortlessly engage the whole class and eliminate distractions instantly. There is no easier way to teach with computers.

Demonstrate lessons on-screen

Share your computer screen with the entire class, giving students an engaging, full-screen view of lessons while keyboards and mice are locked to keep the focus on you. Effortlessly engage the entire class and eliminate distractions instantly.

Block web surfing

Control Internet access during class time. Instantly block or allow access on all student computers with the touch of a button. Even teachers who use computers infrequently will be able to easily manage Internet access.

Supervise student computers

Monitor and supervise student computer activity. Instantly view an updated thumbnail snapshot of all student computer screens on your Vision or School dashboard. Control web surfing and lock keyboards and mice with the touch of a button.

Eliminate distractions

Blank student computer screens and lock keyboards and mice to focus student attention during important discussions and lessons. Keep the entire class working together.

KEY FEATURES

- Easy access to essential classroom management features
