

Netop ProtectOn Pro

Current version	1.2
Latest build	1.200.341.2010
Shipping from	2010-12-08

Scalability and stability improvements in 1.2

Netop ProtectOn Pro Server now supports a larger number of **Netop ProtectOn Pro Agents** and has been stress-tested with 1000 agents.

Extensive improvements were made in the communication layer that connects the Netop ProtectOn Pro modules with two distinct goals: to support a larger number of agents and to improve secured communication across the network.

Bug Fixes

Server blocked with 500+ agents

Netop ProtectOn Pro Server would block when 500 agents were connected and in the process of downloading policies. Access management to the policies database was changed and the defect has now been solved.

Defect: DE5833

Netop ProtectOn Pro Agent: “Run as Administrator” was not available as right-click option

After installing Netop ProtectOn Pro Agent, the command “Run as Administrator” was no longer available on the shortcut menu. The solution was to restart Winsock and the issue has now been solved.

Defect: DE2527

Netop ProtectOn Pro Server: Could not stop Netop ProtectOnPro Server service

If the user tried to stop or restart the service from System Services, the service would report an error and would not stop the service. The issue has now been solved.

Defect: DE5832

Netop ProtectOn Pro Agent: Occasionally application policies did not work on Windows Vista 64bit

Occasionally application policies would stop working on Windows Vista 64 bit systems. As a result the user could open 64bit applications while 32bit applications remained blocked. The issue has now been solved.

Defect: DE1407

Netop ProtectOn Pro Server: Merge application policies worked incorrectly

If the administrator configured multiple application policy blacklists, both blacklisted and exceptions within merged policies would be denied. The issue has now been solved.

Defect: DE2525

Copenhagen, December 2010

Netop ProtectOn Pro

Netop ProtectOn Pro Agent: WiFi whitelist did not work

When the administrator configured a WiFi device access policy and whitelisted one network security identifier (SID), the Netop ProtectOn Pro Agent would prevent access to all WiFi networks regardless of policy configurations. The issue has now been solved.

Defect: DE4174

Netop ProtectOn Pro Console: Scan computers for USB Device Database

While scanning network computers in order to build the USB Device Database, a memory read error was reported. As a result, the database contained only a subset of all installed devices in the network. The issue has now been solved.

Defect: DE5806

Known issues

Problem with VMware virtual PC files

Because of the huge VMware file sizes Netop ProtectOn Pro becomes very slow. We do not recommend using Hard Disk Protection with VMware files.

Workaround:

Exclude VMware folders from Hard Disk Protection
